SPOT Upgrade Notes – 12-11-2018

#	Change	Roles with new function	Reference sheets updated	What it looks like
1.	**NEW FEATURE** **New pagination of Placement Requests to allow for more efficient load times:** Paging has been added to queries run on this page to increase speed of load times and also to decrease clutter of the page. Pages can be navigated with the **previous** and **next** button with an option to **view all** results if required. There is also an option to jump to the first or last page of the search results. Note – **view all** will take longer to load then navigating through pages.	Director	**DRef-012 –** Reviewing previous Placement Requests	2.	**NEW FEATURE** **New pagination of Placement Requests to allow for more efficient load times:** Paging has been added to queries run on this page to increase speed of load times and also to decrease clutter of the page. Pages can be navigated with the **previous** and **next** button with an option to **view all** results if required. There is also an option to jump to the first or last page of the search results. Note – **view all** will take longer to load then navigating through pages.	Education Provider	**EPRef-00 –** Using the Education Provider Dashboard	
3.	IMPROVEMENT **Fixed** an issue that sometimes caused **View all Placement** queries to time out by improving the script for a more efficient load time.
4.	IMPROVEMENT **Fixed** an issue that prevented deleting a Discipline document without adding a new one i.e. you can now delete a discipline document and not upload a new document if this is what is required.
5.	IMPROVEMENT **Changed** a student's **Areas** tab to automatically load to show Edit Placement i.e. the start/end date plus status and required hours instead of Add Period.
