

SPOT Upgrade Notes – 24-05-2018

#	Change
1.	IMPROVEMENT Fixed an issue that meant shift categories without an active shift type against it for an area were appearing when Administering Locations to decrease clutter.
2.	IMPROVEMENT Fixed an issue that meant documents for locations weren't appearing correctly when viewing from the admin view.
3.	IMPROVEMENT Fixed an issue that sometimes meant you could not delete a document that was accidentally added to a placement request.
4.	IMPROVEMENT Fixed an issue that sometimes would stop an admin from being able to save announcements.
5.	IMPROVEMENT Fixed an issue that sometimes meant an error would appear when administering locations.
6.	IMPROVEMENT Added a overnight cleanse of data which disables users that have not logged in the last 6 months (2 years if the user is a student).
